Confidence Restored

The recent announcement of Prime Minister Neville Chamberlain and Foreign Secretary Anthony Eden of Great Britain's intention to face her responsibilities by rearming as speedily as possible and to such an extent that "nobody dare treat her with anything but respect" will fall on many receptive and welcoming ears, not only within Great Britain and the Empire but in other countries who look to Britain for leadership in the task of preserving the democratic form of government.

There is no question but that Britain has "lost face", to use an Oriental expression, during the past two or three years, because of her failure to take a stand in the councils of the League of Nations strong enough to prevent the rights of member nations being violated.

Representative newspaper and magazine writers in some of the smaller democratic countries of Europe, such as the Scandinavian group, who have been wont to look to Britain for leadership and who, at any rate in recent years, have been strong friends of Great Britain have, in the past year or two voiced keen disappointment at the situation and more particularly have expressed criticism over the Ethiopian debacle.

But there was a very good reason why Britain could not go further than she did in attempts to enforce sanctions against Italy as the violator of Abyssinia. No one knew better than the British representatives on the councils of the League that if coercive measures were needed to prevent despoilation of the northern African kingdom she was not in a position to ensure that these methods were carried out.

The British war machine, and particularly the aerial arm of it, had been allowed to become obsolete and no efforts had been made to bring it up to date; or, conversely, it might be more correct to say that other and more belligerent nations had built up huge destructive forces and little or nothing had been done by Britain to keep pace with their activities.

Under these circumstances it would have been futile for Britain to have displayed a fist which was not heavily mailed or to have uttered threats which she could not carry out. She did not want to start something she knew that she could not finish. Hence, nothing more could be expediently done than advise and negotiate, in the knowledge that anything more forceful might precipitate a disaster which the great majority of nations hoped to avoid. It was a policy of prudence and that was the only policy that could safely be adopted at the time.

Now, however, that is to be changed. Great Britain has already commenced an active and ambitious program of rearmament which, in a year or two at the outside, will enable her to resume her role as leader of the European and world democracies in the full knowledge and certainty that the utterances and decisions of her representatives will be respected by even the most powerful and belligerent of nations.

The general objective of the program was aptly expressed by Prime Minister Chamberlain when he told his constituents that it was the aim to make Britain so strong "that nobody dare treat her with anything but respect" and his additional announcement that he faced his responsibilities "without fear or hesitation" will inspire confidence not only in Britain but in many other countries who are genuinely anxious to preserve world peace, as is Britain herself.

Confidence will be further fortified by the supplemental declaration of Sir Anthony Eden that immediate and specific objectives are preservation of the territorial integrity of Spain and the maintenance of the Mediterranean as a main arterial road for the flags of all nations.

Both these objectives have been threatened in recent weeks as the war in Spain progresses. The dismemberment and even the potential dismemberment, of Spain would undoubtedly precipitate a general conflagration in which all the European countries might ultimately become involved and that is what the majority of the non-bellifere nations of Europe fear so much to-day.

Despite the declarations of individual visitors from Europe to this continent to the effect that a general war will be avoided, it is generally recognized on both sides of the Atlantic that the trend of events in Spain, coupled with a great deal of outside interference, constitutes a grave danger to the peace of Europe and perhaps of the world.

A strong and well-armed Britain, with no ulterior motive to serve, will go a long way to allay such alarms and will do much to ensure peace in Europe and security for the democratic countries of that continent.

Something New To Try

According to the Christian Science Monitor, to Horace Creeley, the famous editor, a woman once wrote: "Our church is in dire financial straits. We have tried every device to keep it going—fairs, strawberry festivals, oyster suppers, a donkey party, turkey banquets, Japanese weddings, mock marriages, and box socials. Will you please tell us, Mr. Greeley, what we can do to keep our struggling church from disbanding?"

Starts Annual Patrol

The N. B. McLean, the biggest unit of the government icebreaking fleet, has sailed from here on her annual 5,000-mile patrol in Hudson Bay and strait. The ship, under Capt. W. J. Balcom, formerly of Halifax, will be away until October.

Visitor: "Your son is rather small for his age, isn't he?"
Proud Mother: "Oh, no; most boys of his age are overgrown, I think."

Italy used safety pins 3,000 years ago.

BLACKHEADS

Don't squeeze blackheads—dissolve them. Get two ounces of peroxide powder from any drug store and rub gently with wet, hot cloth over the blackheads. They simply dissolve and disappear by this safe and sure method. Have a Hollywood complexion.

Multiplicity Of Duties

Royal Canadian Mounties In Northwest Territories Kept Busy

Wherever the scientist, explorer, prospector and surveyor goes in the Northwest Territories he finds the Royal Canadian Mounted Police to help him. And he finds the Mountie represents just about a dozen kinds of officialdom.

A government statement dealing with the Northwest Territories discloses the information that "the prevention of lawlessness and apprehension of offenders are but a part of the multiplicity of duties performed by members of the force."

"They are entrusted also with enforcement of the Northwest Game Act, the Migratory Birds Convention Act and various other Dominion acts."

In certain circumstances they are called on to assume customs and immigration duties, to collect income taxes, accept applications for naturalization, act as postmasters, mining recorders or coroners; to issue timber permits, pay wolf and coyote bounties, register vital statistics, issue rations to destitute Eskimos and Indians and supervise liquor permits and importation of liquor.

All commissioned officers are justices of the peace and all ranks are commissioners for administering oaths. Sheriff of the Northwest Territories is Major-General Sir James H. MacBrien, commissioner of the R.C.M.P.

The force has men at 22 points. Along the Mackenzie basin they are stationed at Resolution, Providence, Simpson, Norman, Good Hope, Arctic Red River, Maitland and Aklavik. Scattered along the Arctic shore they are at Coppermine, Cambridge Bay, Cameron Bay, Fort Rae and on the patrol boat "St. Roch."

In the Slave River area is a station at Fort Smith, in the Hudson Bay area at Chesterfield and on McLeod Bay at Reliance. Farther east are posts at Port Burwell, Eskimo Point, Lake Harbor, Pangnirtung, Pond Inlet and Craig Harbor.

Forfeits Crown For Love

Prince Charles Of Sweden Marries Countess Elsa Von Rosen, A Commoner

Prince Charles of Sweden sacrificed any chance of inheriting the throne when he married Countess Elsa von Rosen, a commoner.

The nephew of King Gustaf V. of Sweden and brother of the late Queen Astrid of the Belgians, lost his title and prerogatives in the Swedish royal family.

He acquired a new title, however, becoming by royal decree Prince Charles Bernadotte. His bride, daughter of the Swedish court master of ceremonies, became Princess Elsa.

Prince Charles was the third member of the Swedish royal family in recent years to forfeit his crown rights for love.

The new princess, seven years older than her 26-year-old husband, was divorced in 1935 from M. Aglos von Rosen. She has three children.

Lonely Island Was Safer

Civilization Proved Too Much For Boy From Tristan da Cunha

Civilization proved too much for the youth who left the loneliest isle of the world. After less than a year in London he died.

Donald Glass was a direct descendant of William Glass who founded the settlement at Tristan da Cunha, in the South Atlantic, more than a century ago.

Donald left a happy isle, where disease is virtually unknown, determined to succeed in the great world. He was accepted by the Boy Scouts who tried to make life for him something like that in the home from where he came, but they failed to consider the germs that afflict civilization. He fell ill and gradually declined.

Job Was Thorough

Crude Operation By Amateur Surgeon Probably Saved Man's Life

A crude operation performed with fishline and a net-mending needle appeared to have saved the life of a man badly torn by a rusty spike on lonely San Miguel Island.

Despite twelve days he spent tossing with pain while passing boats overlooked his distress signal, Robert L. Brooks, the injured man, was expected to survive.

Brooks, lessee of the windswept speck in the Channel Islands chain off Southern California, slipped while repairing a wharf two weeks ago and a spike ripped a gaping wound in his thigh.

San Miguel is without a doctor, a boat, or any means of communication with the mainland. No ship was due for weeks.

Realizing that Brooks would bleed to death unless the wound was closed, Herbert Lever, only man on the island, set to work. Lever, shell-shocked World War veteran, lives on San Miguel with his wife and two children, and works for Brooks.

He boiled a fishline and the needle he used to repair fish nets. While the injured man dug his nails into the bunk and gritted his teeth, Lever sewed up the wound without anaesthetic. He prayed while he sewed.

For twelve days no passing craft heeded their distress signal—the American flag flying upside down. Then the motorship Vacuero of Santa Barbara arrived four days ahead of time with supplies. It rushed Brooks ashore.

Physicians at Cottage Hospital said the amateur surgeon was so thorough that no infection developed.

Selling Canada's Wheat

Publicity Campaign In Britain Planned With Care

The Canadian Wheat Board sends us a brochure containing handsomely-printed reproductions of the material used in its United Kingdom advertising campaign.

The board says that so far as it knows this was "the first attempt which has been made by any wheat-exporting country to promote the sale of its wheat by advertising and publicity work."

The campaign was planned with great care. Advertisements designed for their respective fields were used in the newspapers of England, Scotland, Northern Ireland, emphasizing the advantages of Canadian hard wheat in the making of bread. At the same time a series of advertisements in trade journals was addressed to millers, bakers and retailers.

The Canadian Wheat Board is dealing with a product of unexcelled quality, trying to increase its sale in the rich and concentrated market of the United Kingdom, and its campaign appears equal to the occasion. —Ottawa Journal.

Was Infraction Of Law

Man Found His Neighborly Act Cost Him Plenty

It cost George Thiesen of Mennon, Sask., just \$25 to be a good neighbor. He undertook to transport the band from this town, 28 miles northwest of Saskatoon, a few miles to a picnic recently but before he had done his good turn he met up with the law. He was fined in Royal Canadian Mounted Police court for infraction of the vehicles act by carrying passengers in a truck.

A motorist driving 45 miles an hour steadily for 10 hours a day would require 13 years, 10 months, and 21 days to travel over all the improved roads of the United States.

From here it is beginning to appear that trying to get rid of relief is much like trying to throw away a wad of chewing gum, says Judge.

Hamburg, Germany, has a population of more than 1,128,000.

"Wouldn't it be a joke if you was to peg out with only half yer blinkin' sentence done?"—Everybody's, London.

Festival Date Changed

Set Back One Month When Delegates Met At Moose Jaw

Dates for the 1938 provincial music festival were set back a month as delegates from five provinces concluded the 12th annual conference of the Western Canada Music Festival Associations at Moose Jaw. Next year the Saskatchewan festivals at Saskatoon and Regina will take place the latter part of April, from April 25-30. At present, no definite arrangement has been made as to whether Regina or Saskatoon will conduct its festival first. So far, the old arrangement will be followed, whereby in 1938 Regina will be first, Saskatoon second.

In 1937, the festivals took place during the last week in May. Delegates were present from Saskatchewan, Manitoba, Alberta, British Columbia and Quebec.

Represented for the first time at the conference was the Quebec Musical Competition festival which held its first festival this year in Montreal. The organization was represented by R. Willis, Montreal.

Adjudicators for 1938 will be Sir Hugh Robertson, Glasgow, Scotland, who will adjudicate choral and vocal competitions; Maurice Jacobson, London, instrumental and choral adjudicator, and Stewart Wilson, London, who will also adjudicate vocal competitions. Mr. Wilson is new to Canada, but Sir Hugh Robertson has been in the Dominion on several occasions as adjudicator. Mr. Jacobson has been here once before.

In 1939, the same three adjudicators who recently completed their tour of Canadian festivals will return: Dr. J. F. Staton, George Dodds and Arthur Benjamin. Dates for festivals both in 1938 and 1939 were set recently, as delegates pushed through to completion in two days a session originally scheduled to last three days.

SELECTED RECIPES

PICKLE RELISH

2 qts. cucumbers
2 qts. onions
1 large cauliflower or cabbage
3 peppers, red or green
1/2 gallon mild vinegar
6 cups brown sugar
2 cups Crown Brand Corn Syrup
1/4 cup Benson's Corn Starch
1/4 cup mustard
1/4 teaspoon turmeric powder
2 ozs. mustard seed
2 ozs. celery seed
Method: Chop all vegetables fine. Let stand in brine overnight (1/2 cup salt to each quart water). Drain. Make a syrup of vinegar (reserving 1/4 cup for dressing), sugar and Crown Brand Corn Syrup; add vegetable and let come to boil. Make a dressing of Benson's Corn Starch, seasonings, spices and 1/4 cup cold vinegar. Stir into hot mixture. Again bring to the boil; seal in sterile jars. Makes 5 pints.

Had Successful Year

Canada's Fishing Industry Showed Big Increase In 1936

Canada's fisheries in 1936 experienced the most successful year since 1930, the Dominion reported.

Value of production in 1936 was \$39,164,618, the total representing the value of fish as marketed, whether sold for consumption fresh, or as canned, smoked, dried and other forms. It showed an increase over 1932, low year of the depression period, of \$13,207,509 or 51 per cent. Total quantity of fish taken by Canadian fishermen during 1936 was 11,088,279 cwt., with a value at the point of landing of \$22,083,742, compared with a catch of 9,532,016 cwt. and a value of \$20,755,787 in 1935.

Easy To Identify

When the police of Hermanus, South Africa, inspected the trail of a barefoot burglar, who had stolen \$100, the Sherlock Holmes instinct told them the capture should be easy. One of the big toes was peculiarly formed. All the well-known jail characters passed inspection, and the trail finally led to N. Cupido, an amateur burglar, who was sentenced to four months hard labor.

Moonlight has an intensity about one-fortieth of a foot candle; bright sunlight at noon has an intensity of about 10,000 foot candles.

Left Legacy For Poor

But Town In Scotland Has No People Who Qualify

There is a small town in Aberdeenshire, Scotland, called Turriff, with a population of over 2,000, who are a very proud people. That is not to say they are conceited, or affect a lofty attitude toward other communities. The colloquial name for it is "Turra," and the locals have a slogan: "Tak awa Turra an' twal miles roon and whau are ye?" If you don't know what that means we'll interpret: "Take away Turriff and twelve miles around and what is left of the universe that is worth while?" That's the sort of people they are in "Turra." They regard their town and environs and the people within as the hub of humanity.

Turriff has really justification to boast though. Recently a native of the town died in New Zealand and made a bequest of \$25,000 for the poor of Turriff. That is where the Town Council is in a pickle. There are no poor in Turriff and the administrators cannot carry out the terms of the gift because there is nobody to give any part of the money to. Pending some solution, or the improbability that some of the local folks will go broke, the \$25,000 has been handed over to the custody of the County Council.

A place of that kind surely lives up to the distinction which it confers upon itself.—St. Thomas Times-Journal.

A Modern Pastime

Many People Before Public Eye Receive Fan Mail

A writer in the Manchester Guardian considers a trend of to-day that is new and astonishing in vastness—"fan mail."

"Thousands and thousands of these letters are posted every day. It began with actors and actresses, singers and other public entertainers who have for years received letters from their admirers, but as soon as the cinema became the chief medium of entertainment girls and boys, and principally girls began to write to the film stars and fan mail really began. Now it is not confined to film stars, but extends to prime ministers, as we heard from Stanley Baldwin. It extends to everyone who comes before the public eye, even to wrongdoers. . . .

"It is rarely, however, that any one speaks of his pastime. It is a private matter between himself and the adored one, for most of the letters are tributes of admiration."

Accurate Information

Milwaukee Has Plan To Determine What Visitors Spend

H. B. Cowan, Jr., manager of the Examiner's circulation department is just back from attending a convention at Milwaukee and reports an interesting plan by which the Milwaukee Association of Commerce gets accurate information as to the extent of the expenditures made by visitors to the city. Every delegate to a convention receives a questionnaire which he is asked to fill out showing where he stayed, what stores his chief purchases were made at and how much he spent on shelter, amusement and other things, the information to be regarded as strictly confidential.—Peterborough Examiner.

Argentina, Canada, China, Great Britain, India, the Netherlands, and the United States are the most important markets for German watches and clocks.

Berlin is now the third largest city in the world, next to New York and London.

The yearly average of forest fires in the United States is 4,700.

MINARD'S "KING OF PAIN" LINIMENT

Many Factors Enter Into Establishment Of A Sound Plan Of Crop Insurance

Crop insurance attempts in Saskatchewan had failed for several reasons, one of which was small capitalization and lack of adequate financial reserves of operating companies, stated Wilmer J. Hansen, of Ottawa, who addressed members of the Canadian Society of Technical Agriculturalists at Saskatoon. Mr. Hansen reviewed the whole question of crop insurance as it was related to Saskatchewan.

It was significant, he said, that in the period 1918-1935, there were only three years, 1922, 1923 and 1928, when the average yield of wheat did not fall to five bushels per acre or less in any one municipality of the province. "Even in those years, it may be safely asserted that crop failure was experienced on a considerable number of individual farms," he said.

There were many factors affecting the wheat crop in Saskatchewan which demanded consideration in insuring the crop. Some of these were soil and topography, chemical, physical and biological characteristics of the soil, arability, texture of soil and subsoil, tendency to drift, location with respect to the drouth area, climatic conditions, prevalence of plant disease, infestation by birds, animals, rodents and insects, besides many farm procedure factors, including preparation of the seed bed, selection of wheat varieties, the depth and rate of seeding, adequacy of farm power, weed control, insect control, rotation methods, use of fertilizers and so on.

The yield of wheat per acre was the result of the unpredictable combination of all the foregoing factors. During the last 20 years, Mr. Hansen said, the yield of wheat per acre had been a more important factor than the acreage seeded in determining the total production of wheat in the province.

During the period 1916-1935, 252,000,000 acres had been seeded to wheat. Regarding yields not in excess of five bushels per acre as crop failures, approximately nine per cent. of the acreage seeded to wheat had been a crop failure, and four per cent. had produced bumper crops. Bumper crop periods had been less frequent than other type years. "They are apparently the exception rather than the rule," the speaker said.

Several attempts at crop insurance had been made by insurance companies, the types including yield insurance (general crop coverage) cost of production or investment, minimum cash value per acre, citrus and truck garden crops, and hail insurance.

The attempts at general crop insurance had failed because, (1) operations were restricted to a relatively small area, the entire territory of which was affected by drouth. (2) The insurance contract covered prices as well as yield, and prices took an unexpected drop. (3) The data were insufficient upon which to base coverage and premium rates in order to avoid over and under insurance. (4) Inefficient management and lack of control over agents; writing of insurance late in the season when it was evident losses would be incurred, and (5) small capitalization and lack of adequate financial reserves on the part of the operating companies which would enable them to spread risks and conduct operations for a long period.

The problem of crop insurance was not that of averaging losses of the individual farmer from year to year, as it was one of averaging the losses over a period of years, the speaker declared. It was not so much of spreading the income of a group of farmers as much as spreading the income of individual farmers over a period of years.

Yield insurance aimed at giving protection covering such uncontrollable hazards as drouth, hail, wind, temperature, insect infestation, plant diseases, flood, lightning and tornado. A 60 per cent. coverage of the long-term average yield of wheat would perform a reasonable service, the speaker believed.

He discussed the advisability of compulsory crop insurance, and drew the conclusion that a modified compulsory crop insurance plan was desirable. Technical insurance matters, such as payment of premiums and the position of tax payments with respect to indemnities, were also discussed.

"Did you hear about Smith, the bank cashier? He's stolen fifty thousand dollars from his bank, and run off with his friend's wife!"

"Good heavens! And who'll take his Sunday School class to-morrow?"

Toads Eat Bugs

And They Grow Them Large In Hawaii

"Hawaiian toads" are the latest discovery of American agricultural experts in their efforts to find destroyers of insects that attack crops.

The toads, scientifically known as the Bufo Marinus, first were introduced into the Hawaiian Islands a few years ago, where they proved extremely useful in eradicating all harmful insects on sugar plantations.

Since then, they have become sufficiently numerous to permit exportation, and the first foreign demands have come from the British colony in the Fiji Islands, where they again are giving excellent results.

They are now sufficient in numbers to permit of exportation to any country of the world that asks for them.

They are the largest toads known and can devour an amazing quantity of bugs.

New Gadgets

U.S. Patent Office Cluttered Up With Inventions

Inventions on which patents were granted by the U.S. Patent Office during the past month included the following:

A necktie constructed in telescoping sections so that it can be adjusted to any length.

A golf club with a drill in the top of the shaft for boring a hole in which to insert a wooden tee when the ground is hard.

A salt shaker with a rotatable brush inside the cap for clearing the perforations of caked salt.

A refrigerator tray which freezes ice in spheres instead of cubes.

A streamlined head for golf clubs.

A sandwich bag with a special compartment in the bottom for salt and pepper.

A machine for slicing mushrooms.—Time.

Now Honored By Nation

Chinese Once Denounced As Traitor Given New Home

Ma Hsiang-po, 98-year-old state councillor who was impeached as a traitor 40 years ago because he tried to float a loan in the United States for industrial development of China, has moved into a new home in Nanking.

Public funds of \$15,000 were raised to honor his great age and a new house was built. Ma was impeached in 1897 by the Peking board of censors who backed the anti-foreigners campaign of Tsu Hsi, empress dowager. A devout Catholic, Ma attributes his great age and continued vigor to his unvaried diet consisting of sweet milk, sweet biscuits, light French wine, chicken broth, poached eggs, orange juice and hot chocolate.

Study Quints

To Publish Result Of Psychological Study Carried Out By University

Why Canada's world-famed Dionne quintuplets behave as the five healthy youngsters they are will be disclosed in his next annual report, Dr. Allan Ray Dafeo, their physician, said. The report will be published this fall. Results of a psychological study of the quintuplets, carried out by University of Toronto experts under Dr. W. E. Blatz, psychologist and educationist, are being compiled now. Findings of the experts were passed on to Dr. Dafeo.

Good After Dinner Story

The death of the window of Pett Ridge recalls the wonderful work he did for children in East London. A humorous writer, his hobby was child welfare. He was also a first-class after-dinner speaker. One of his best after-dinner stories was of a notice which he said he had seen outside one of the then new dance halls. This notice read: "The management have the right to refuse admission to any lady they think proper."

Strange Security

Lunghua Pagoda, which has stood for ages as the most noted landmark of Shanghai, has been mortgaged for \$300 by the monks of Lunghua Temple to a rice shop in a nearby village. The abbot was embarrassed recently when he was asked to pay a large rice bill contracted by the temple, which has been insolvent for a long time, and he asked the proprietor of the store to take the pagoda as security.

King George I. of England, could not speak the language of his domain.

SMALLEST PONY AT INTERNATIONAL SHOW

Above is the smallest shetland pony entered at the International Horse Show at Olympia, London. Its charming mistress has no difficulty holding the little fellow by its front feet.

Rubber Trees Short Lived

Are Only Valuable Commercially For About 30 Years

A short time ago we learned a lot about tea plantations in India from J. M. Kilburn, of Assam, and then we took our second lesson in exporting trades of the British Empire from Mr. and Mrs. H. E. Sparks, a charming English couple who have left their rubber plantation in Penang, Strait Settlement, for a trip to the Old Country. . . . We were told that rubber, as it runs from the trees looks like a harmless cup of milk, but it has a nasty trick of gumming up everything it touches. A couple of drops in your hair, for instance, will send you to the barber to be shaved as bald as a baby. Estates, staffed mostly by tappers from Sumatra, India, run from 200 to 10,000 acres. Trees resemble our fir in size and live indefinitely. Their commercial life is about 25 to 30 years, but science is devising a system of bud grafting at the base of the trunk which planters hope will raise yearly production from 400 pounds an acre to two thousand. The milky sap (called latex) is lugged to the factory where it is sieved into tanks, broken down with water and mixed with acid to coagulate. It's left overnight with aluminum slats inserted in the tanks, so that in the morning the rubber has formed hard white slabs. These are rolled to one-eighth-inch thickness and sent to the smoke house for two to five days until thoroughly dry and a beautiful amber brown in color. The product is then exported to manufacturers throughout the world who start in to tear the slabs apart and make them all over again. . . . Mr. Sparks has been on his plantation for 27 years. When he first arrived he covered the estate on horseback, but now he uses a little two-seater car to go over his 2,000 acres.—Toronto Telegram.

Weight has no influence on the velocity of falling bodies. An iron ball and a wooden ball, of equal size, will fall at the same rate of speed.

Passenger trips taken on British railways in a recent month numbered 99,911,912.

Clay In The Cypress Hills

Rich Deposit Of Bentonite Is Awaiting Development

Mr. W. G. Worcester, professor of ceramics in Saskatchewan University, reports that rich deposits of bentonite in the Cypress Hills area await development. Bentonite is used in 50 different commercial processes. Its chief use in oil refining is that of decolorizing oil, and in soap-making of whitening off-colour talloils. Old newsprint is now being recovered in the United States by a process in which the clay is employed to remove printer's ink from newspapers and magazines, and clean paper is then made from the pulp. Dry cleaners use this clay for rejuvenating cleaning fluids.

Park Animals Friendly

Antics Of Bears Go Over Big With Jasper Visitors

Various species of wild life are now looked upon as part and parcel of the everyday doings at Jasper Park Lodge. This year the four-footed animals seem to be on a more friendly basis than ever and already have come out to check the guests at the lodge over. Apparently they have approved and are carrying on where they left off last year.

The bears, of course, rate highly in guest interest and already have started to stage their hippodrome wrestling bouts on the first fairway of the golf course. Their frolicking antics have gone over in a big way with the early visitors.

Would Be Accommodation

One of the latest suggestions for the railways, put forward by an executive of a railway equipment company, is for a double-deck passenger car with skeleton framing, which will quickly load automobiles from station platforms and transport them with the passengers' luggage and the passengers below.

The Persian water pipe is known as a "hookah." Smoke is drawn through a vase filled with water, by means of a long, flexible stem, or tube.

Combine Crochet and Cross Stitch

Household Arts by Alice Brooks

Use Them Together or Each Alone

PATTERN 5751

Here's a bit of simple "Addition" that adds up to something full of charm and color! Combine a border of crochet with a cross stitch motif that echoes the same dainty rose design, and you'll bring new beauty to scarf, towels, pillow cases or other linens. If you prefer, use either the cross stitch or crochet alone, doing the embroidery in a single or varied colors, the crochet in white or colored thread. In pattern 5751 you will find a transfer pattern of two motifs 4x10 1/2 inches; two motifs 3 1/2 x 7 1/2 inches; a chart and directions for a 3x15 inch crocheted edge; material requirements; illustrations of all stitches used; color suggestions.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Farm Club Work Has Placed Young Farmers In Position Of Commanding Importance

Depends On Circumstances

Sometimes Hard And Fast Rules Should Be Broken

On retiring after 46 years of progressively successful service to the Canadian Pacific Railway, one employee declared facetiously that his promotion was accounted for by his breaking of the company's rules. This sounds like insubordination, but insubordination will not get any individual far along the road to success. A little thought brings the conviction that circumstances may arise in which hard-and-fast regulations will not work. In moments of doubt a man, eager to do the right thing, may throw aside all the rules, letting common sense be his guide. In the railway business, as in all extensive enterprises, quick decisions are necessary, and there may be no time to consult the rule-book. There will be more commendation for a man who succeeds by breaking the rules than for one who fails by sticking to them.

There are precedents for this disregard of orders and rules. Military leaders find themselves in positions where disregard of recognized tactics and reliance on initiative will save the day. And didn't the mighty Nelson at Copenhagen place his blind eye to the telescope when signals ordered him to retire from the battle? And where is there a greater naval hero than Nelson? He disobeyed commands but "England expects every man to do his duty" was most effective than orders. Any way, William Fulton has been a highly successful railway official.—Toronto Globe and Mail.

Process Is A Secret

Molten Glass Can Be Drawn Into Fine Strong Threads

Underwear, blankets and wool can now be made from glass. The process of manufacture is a close secret, but this much is known. Steam is applied to molten glass and turns it into a snow-white, fluffy mass which can be drawn into fine threads of great strength.

Each thread is 1-20th the diameter of a human hair and is drawn at the rate of 260,000 feet per minute, or 3,000 miles an hour—faster than a high velocity rifle bullet! If the quantity of glass in an ordinary pint milk bottle were subjected to this process it would more than lap the world at the equator.—Montreal Star.

Takes Flyer's Advice

Sir Malcolm Campbell Has 34,500 Tennis Balls In Speedboat

Sir Malcolm Campbell, holder of the world land speed record, took a tip from the trans-Atlantic fliers, Dick Merrill and Harry Richman, in building his new speedboat, the Bluebird, which was launched in Scotland on Loch Lomond. Sir Malcolm may use the boat in an attempt to capture the world speed record from Gar Wood. Following the idea of Merrill and Richman, who flew the Atlantic with table tennis balls stowed in the wings of their plane, Sir Malcolm has 34,500 table tennis balls lining the hull of his speedboat to give added buoyance.

A Sensible Idea

Plan Adopted By Parents Of Popular Daughter Works Well

Mary stayed out later than her parents thought she should. She is 18 and her parents used to sit up and wait until she came home. Mary said she was being treated like a child. So they set an hour between the time Mary thought she should be in and the time the parents said was right and the alarm clock was placed at that hour. Now the parents go to bed on time and it is up to Mary to be home in time to "unset" the alarm clock and the plan works well.—Parents' Magazine.

On Long Trip

Government Ship On 5,000-Mile Patrol In Hudson Bay

The N. B. McLean, biggest unit of the government icebreaking fleet, has sailed from Quebec on her annual 5,000-mile patrol in Hudson Bay and Strait. The ship will be away until October.

On board were 11 wireless operators who will relieve men stationed in the northern lighthouses since the ship's visit last year.

Overalls with pictures of the city printed on them are now sold in London.

One of the distinctive features of modern agriculture in the Dominion is the prominence of youth in all that pertains to the industry. This was not always so. In times gone by, owing to force of circumstances there was little inducement to youth on the farm further than a love of hard work, but, since the interest of young people has been aroused, the love of achievement in the oldest and greatest of all industries has placed the young farmer in a position of commanding importance.

This commanding position is in reality the outcome of one of the most progressive and encouraging movements of modern times, namely, farm club organization for girls and boys. Officially known as "Boys' and Girls' Farm Club Work in Canada," the movement is designed to develop interest in the farm and farm life; to provide a practical education in agriculture and home economics; to improve farm practices; to encourage the use of better livestock and seed; and to train young people for citizenship in their respective districts.

The boys' and girls' farm club work is encouraged by Dominion and Provincial Departments of Agriculture, and Extension Departments of the Universities and Agricultural Colleges, and is consolidated and coordinated through the "Canadian Council on Boys' and Girls' Farm Work." The movement is national in its scope and outlook, and the increasing enrolment of members is encouraging. In 1931 there were 1,215 clubs with a membership of 21,142. In 1936 the number of clubs had increased to 2,098 and the membership to 34,457.

The membership of the Canadian Council on Boys' and Girls' Farm Club Work includes the Dominion Department of Agriculture, the Provincial Departments of Agriculture, with the exception of Saskatchewan which is represented by the Extension Department of the University, and several business institutions and associations. The central office of the council is in the Confederation Building, Ottawa, and the General Secretary is A. E. MacLaurin.

Would Help Growers

If Canada Had More Plants For Canning Vegetables

Possibly if Canadians knew better how to can vegetables or if cities encouraged the establishment of plants as canneries in smaller centres, we should help Canadian growers and workers. For the value of the fresh vegetables imported during April increased approximately \$133,000 over April, 1936. The amount was \$792,000 as compared with \$659,000 of which the United States supplied \$609,221. Domestic exports of fresh vegetables were worth \$145,000 as compared with \$103,000 of which the United States took \$113,174. Potatoes were exported in heavier volume, amounting to 196,736 bushels as compared with 102,003, the United States being the largest purchaser.—Brandon Sun.

Indian Prince Buys Jewels

Pays \$74,175 For Necklace Which Belonged To French Queen

An Indian prince paid \$15,000 (\$74,175) for a diamond necklace which belonged to Marie Antoinette. The necklace, with 43 stones in a red Morocco case bearing the coat-of-arms and initials of the French queen, was purchased at Sotheby's auction by an agent for the Maharajah of Barhanga. It was sold by its joint owners, the Archduchess Blanca of Austria and Princess Beatrice of Bourbon, daughters of Don Carlos, late claimant of the Spanish throne.

Sky Scrapers In Germany

Hamburg is to have a towering New York-like skyline as a "monumental expression" of its importance as a world port. An extensive program of tall buildings has been authorized by Chancellor Adolf Hitler and announced to the Hamburg Senate. One of the first projects will be a 60-story skyscraper, 830 feet high. Others, ranging up to 15 stories, will include a hotel for workers.

The Indian swallow, the bird that "lives in a glass house," glues the top of its nest to a rocky cliff, and spins a basket-shaped structure of gelatinous threads that harden in the air and resemble amber glass.

J. M. Barrie, in "Dear Brutus," said there were three things which a man can never recall: the spoken word, the past life, and the neglected opportunity.

Synopsis of Land Act

PRE-EMPTIONS

VACANT, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation and improvement.

Full information concerning Pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C.; Bureau of Provincial Information, Victoria, or any Government Agent.

Records will be granted covering only land suitable for agricultural purposes within reasonable distance of road, school and marketing facilities and which is not timberland, i.e., carrying over 5,000 board feet per acre east of the Coast Range and 8,000 feet per acre west of that Range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division in which the land applied for is situated, on printed forms obtained from the Commissioner.

Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

Pre-emption carrying part time conditions of occupation are also granted.

PURCHASE OR LEASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes. Minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land, \$2.50 per acre. Further information is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

As a partial relief measure, reverted lands may be acquired by purchase in ten equal instalments, with the first payment suspended for two years, provided taxes are paid when due and improvements are made during the first two years of not less than 10% of the appraised value.

Mill, factory or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads, conditional upon a dwelling being erected in the first year, title being obtained after residence and improvement conditions are fulfilled and land has been surveyed.

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

Under the Grazing Act the Province is divided into grazing districts and the range administered under grazing regulations amended from time to time to meet varying conditions. Annual grazing permits are issued based on certain monthly rates per head of stock. Priority in grazing privileges is given to resident stock owners. Stock-owners may form associations for range management. Free or partially free permits available for settlers, campers and travellers, up to ten head.

Moved!

I have moved and am now located in the former News Bldg. on Montrose Avenue across opposite the Post Office.

IN MEMORIAM

IN LOVING MEMORY of our dear Husband and Father, Thomas Dawson, Straiton, B.C., who passed away August 8th, 1936.

One year has passed, dear loved one, Since you were called away; How well do we remember That sad and weary day. But peacefully sleeping, resting at last,

HUNTINGDON

C. J. Isaacs has returned home from New Westminster, where he has been engaged at carpenter work for several months.

Mr. W. L. Blatchford of Huntingdon is making an extended business and pleasure trip to several points in Alaska. In the early days he was a prominent resident of Alaska and participated in one of the mining booms.

Mr. and Mrs. Hector Tapp visited Mr. and Mrs. F. J. Tapp for a few days last week.

Mr. C. H. Allen and family, who have conducted a grocery and meat business in Huntingdon, are moving to the Okanagan valley.

Mrs. T. A. Walker and four daughters of Crow's Nest, B.C., are spending two weeks vacation with her parents, Mr. and Mrs. F. J. Tapp.

An oil coat has been given "C" street from the border to Vye road, alleviating the dust nuisance.

Mrs. H. L. Beetlestone was guest of Mrs. Jermyn in Vancouver last week.

Donald Waterston had the misfortune to break his arm recently, when he slipped off a load of hay.

MT. LEHMAN

Miss Stasia Moran entertained at a kitchen shower on Saturday evening in honor of Miss Rosetta Heron, whose marriage to Mr. August Burnier of Abbotsford took place last week. Assisting Miss Moran were her mother and sister Joyce and Miss Lily McDonald.

Eileen Simpson and Evelyn Nelson are spending two weeks at Ocean Park, representing the Mt. Lehman C. G. I. T. at the summer camp of the United church.

Guests of Mr. and Mrs. T. F. Selton for a time are their son-in-law and daughter, Mr. and Mrs. J. Roxburgh, who, with their two children, motored here from their home at Ingersoll, Ont.

Mrs. Frank Smith, who underwent a minor operation in the M.S.A. hospital last week, is progressing favorably.

36 Page Prize List Out This

Week for Central Valley Fair

More classes, more prize money and a "bigger and better fair" are promised this year by the Central Valley Fair Assn., whose third prize list will be issued this week-end by Messrs. L. Kettle and T. D. Smith. Here we number the classes in each division, so judge for yourself:

Horses, 16 classes; cattle 39 cl.; swine 5 cl.; poultry and pets, 44 cl.; dairy produce 6 cl.; field crops 37 cl.; vegetables 52 cl.; fruits 29 cl.; flowers 37 cl.; needlework 63 cl.; cooking 51 cl.; school work 44 cl.; sheep 18 cl.—almost every division will be larger and more representative. In addition to the generous cash list this year, the zealous team of canvassers have "brought home the bacon" in the form of a substantial list of "specials" which range all the way from a sack of flour to a \$100 "commercial" course.

Fair dates are September 14 and 15 on Jubilee grounds where the stock barns and pens have been enlarged in anticipation of more entries.

Copies of the list, which comprises 36 pages and cover, may be obtained of members of the Fair Board or at The News office.

In order to encourage more entries and keenest competition in the women's work, it has been decided this year to reduce the entry fees in the flowers, cooking and needlework classes. In former years the entry fee of 10¢ each entry proved expensive when a number of classes were entered, so the fee this year has been reduced to five cents each entry in the three classes. Another change made by the board of management this year is the granting of an extra free entry to members of the association—now giving each holder of a 50 cent membership ticket six free entries in the fair.

John Zalesky sprained his wrist while at work at The News office on Friday.

Jack Lamont and Harold Tessaro are spending a holiday down South.

Local Bowlers Start With Blessing of City Brethren

At a very pleasant gathering last Saturday afternoon, Mr. Reid, of Vancouver, representing the B.C. Lawn Bowling Association, declared the Abbotsford bowling green officially open. Attending the event were over 70 people, including representatives from bowling clubs at Stanley Park, White Rock, Central Park and Chilliwack.

After an address of welcome given by Mr. Pratt, president of the Abbotsford Bowling Club, Mr. Reid, in declaring the green open, congratulated the local club on the condition of the green and its excellent location.

A pleasant afternoon of bowling was then enjoyed, followed by an excellent supper served on tables set on the shady lawn of Mr. and Mrs. M. C. Switzer.

Mrs. F. Shack and baby of Vancouver are visiting the former's parents, Mr. and Mrs. Lamont.

Hundreds of acres of peas on Matsqui are a loss through the early summer rains.

October 11 has been named Thanksgiving Day in Canada by proclamation in the Canada Gazette.

DONALDSON—MANUEL

A wedding of interest to residents of Bradner district took place last week at the home of Rev. C. Mitchell, when Muriel Joyce, youngest daughter of Mr. and Mrs. C. Manuel became the bride of Robert F. Donaldson, the only son of Mr. and Mrs. R. R. Donaldson. The bride, attired in a dress of white satin, matching hat and a bouquet of pink roses and white lilies, was attended by the groom's sister, Miss Edith Donaldson, who was also becomingly attired in white.

Following the ceremony a reception was held at the home of the bride. Later the young couple left for a honeymoon in Victoria. On their return they will live in Bradner.

WILLIAM H. BALL

The death occurred on Sunday at Mission of William H. Ball, 39, who passed away after a long illness. Deceased had resided on McCallum road, Abbotsford, and at Goldbridge. He was a native of Ontario and is survived by his wife and infant daughter. Also by his parents, Mr. and Mrs. Fred Ball, Mission, and a brother Fred Ball. The funeral was held today at Mission.

NAZARENES CLOSE SERIES OF CAMP MEETINGS HERE

The Nazarene camp meeting closed this week, culminating a successful series of meetings at which the attendance reached 100 last Sunday. A new event for the Nazarene church in B.C., the organizers hope to make of it an annual event. The camp budget was \$170, one-half of which was spent locally, and next year the budget will be larger.

Prominent at the meetings was Rev. D. P. Henry and Mrs. Henry of Portland, Ore. (who built and operated the City Mission, Vancouver 1905-15) Rev. J. R. Spittal and Mrs. Spittal, David Spittal, soloist and pianist, all of Red Deer, Alta., and Rev. N. J. Arechuk of Vancouver.

ALDERGROVE, B.C.

Improving Mt. Lehman School Grounds And Municipal Park

Matsqui's municipal grounds and school site at Mount Lehman are fast becoming a veritable oasis of landscape beauty amid a near-virgin wilderness of bush country. This week, under joint arrangement of the Council and school administration, a crew of 12 men with truck is proceeding with grading work started last year, and now almost complete. When the job is done, Matsqui will have a most presentable six-acre park at this convenient spot, well set out with evergreen shrubbery and flowers, and boasting a quarter-mile grass track for races. With its complement of seats and shade trees it will resume its former popularity as community picnic rendezvous, and is well worth a mile diversion from the main highway even to the passing traveller who may enjoy an occasional siesta.

PINE GROVE

Mr. and Mrs. Bill Chalmers (nee Miss Helen Neissen) were showered by friends on Saturday at a jolly party in the community hall. J. McBeth orchestra played for the dancing, and the young couple received many nice gifts. About 100 persons were present.

Billy Taylor is holidaying with Mr. and Mrs. Herling at Garrett, B.C. and with his father at Bond Sound.

Annie and Jean Foster have returned from a visit with their grandmother at Yarrow.

Jackie Barter and his cousin David Nuthall have returned from Powell River.

Miss Barbara Frey is visiting her aunt Mrs. Barrett, Vancouver.

Mrs. Harry Hodgins of Stave Lake spent the week-end in Pine Grove.

Jennie Frey and Jerry are visiting Mrs. Hodgins at Stave Falls.

Mrs. D. Holmberg is spending a month with Vancouver friends.

Pine Grove W. I. will hold its next meeting in the community hall on August 10.

BOY SHOULD BE TRAINED TO ASSIST IN THE HOME

Our sons are the husbands of tomorrow. As their mothers have educated them, so they will behave toward their future wives. Therefore, if this education is correct, the results will be beneficial to more than one generation.

Only yesterday the association between son and housework would have been ridiculous. Even the smallest service in the nomenclature was considered degrading to masculinity. The husband who did not deem it below his masculine dignity to tend the wife a helping hand about the house was derisively looked upon as hen-pecked.

But times change and our modes change along with them. The war has taught many a man how useful it is to know how to handle pots and pans. Under the prevailing economic conditions, a little culinary knowledge is a boon not only to the bachelor but also to the husband. Illness or the absence of his wife, and especially her professional occupations, often oblige him to provide for himself.

Would it not be better then, to start in time and give your growing-up son an idea of how to behave at the kitchen range, and in the hundred little emergencies of which the job of the housewife is made? It need not be a course of domestic science, but our efforts in this direction should be persistent and systematic.

Boys Should Help in House

And why shouldn't the son occasionally make his bed or tidy up his room on a Sunday morning, when the family is hurrying to get ready for the picnic? Households with servants are scarce in this district.

Independence in the home—this should be the slogan for our sons. The modern woman, especially if she pursues her own professional career, does not want a parasite who expects to be waited on all the time, but a responsible collaborator. If you bring up your sons in the spirit, they will not consider it degrading to help mother or sister, and later the wife, in her household duties.

Start early by giving the youngster some easy little task to perform and you will thus create a habit that will help to overcome the obstinacy and sauciness of the older boy. The latter can often be influenced by appealing to his chivalry. After all, mother and sister are women, and a real man should never demand menial services from them.

Mrs. Hulton-Harrop returned from a visit to the Old Country on Monday.

Mr. and Mrs. B. Bevan returned last week from a motor trip to Los Angeles. Their sons Louis and Billy are opening a bicycle shop on Main street, Vancouver.

HUNT BLOCK
ABBOTSFORD,

WORLD HAPPENINGS BRIEFLY TOLD

Reserve championship for Percherons at the Calgary exhibition was won by Konzeur, owned by Mitchell and Reith of Edmonton.

Harvard observatory has announced the discovery by Dr. P. Finsler, professor of mathematics at the University of Zurich, Switzerland, of a new comet of the seventh magnitude.

T. H. Bickle, son of Edward Bickle, Toronto broker, died by asphyxiation at the bottom of the St. Lawrence river while he worked in diving equipment attempting to recover an outboard motor.

Twenty-two more employees of the Soviet Far Eastern Railways have been executed as "agents of the Japanese intelligence service, spies and diversionists," Khabarovsk press advises reported.

Prime Minister Chamberlain has accepted an invitation to become honorary president of the League of Nations union, it became known, but coupled his acceptance with a strong warning the union must be strictly non-party in character.

A contract for the construction of an aircraft carrier as part of the 1937 naval building program has been awarded to Vickers-Armstrong, Ltd., of Barrow-in-Furness, the admiralty announced. The warship is to be named H.M.S. Indomitable.

Canada should have a coast-to-coast line of beams to safeguard air travel, Hugh B. Monaghan, past president of Hamilton Aero Club, said on his return from a trip to Moose Jaw via the air route. Radio was needed for safety, he said.

A homing pigeon, "Lady Churchill," released at The Pas, Man., May 18, has completed its flight home to San Antonio, Texas, a distance of 2,039 miles, a communication from Texas stated. The 43-day hop was considered by birdmen to constitute a world's record.

Method Has Been Improved

Engines Oiled While Train Is Moving Means Increased Speed

Recent improvements in the methods of lubrication, to keep moving parts properly oiled while a train is in motion, enables locomotives to meet the growing demands for increased speed and extended runs. This was one of the developments described to the mechanical division of the Association of American Railroads, in convention in Atlantic City.

Many locomotives now are equipped with mechanical lubricators which keep roller bearings, side rods and other moving parts oiled adequately, thus avoiding wear and friction. Not only does this make possible greater efficiency, but it also reduces terminal servicing of locomotives. Steam locomotives in numerous cases now operate on continuous runs of nearly 1,000 miles, while in the passenger service on certain railroads. Diesel locomotives operate on continuous runs in excess of 2,000 miles.—Buffalo Courier-Express.

Baulking The Auto Thief

New Style Of License Plate Designed For Drivers' Protection

A license plate intended to baulk the most wary auto thief by making him a mark for policemen or citizens as soon as he tries to slip away unnoticed in a stolen car has been invented by Messrs. Philip Parkes and Thomas Richardson, of Winnipeg.

When the car-owner parks his machine he pulls out a section of the plate, cut to slide easily into place against a riveted-on back piece of heavy tin, painted a glaring red. This leaves an incomplete plate with a red gap in it that says plainly: "I belong to a stolen car. Come and get me." A car thief cannot get far with the red spot showing. But the rightful owner of the car, returning to his parking place and finding his machine where he left it, merely slips the missing part back into place and goes on his way with a complete license.—Brockville Recorder and Times.

Sodium Sulphate Production

The natural sodium sulphate industry is growing rapidly in Saskatchewan, having risen from 6,592 short tons in 1929 to 72,000 tons in 1936, according to "Canadian Finance". Sodium sulphate is used in the manufacture of craft paper, and in the smelting of nickel-copper ores. It is also used in the glass, dye and textile trades, and for medicinal and tanning purposes.

Stamps Deplet Food Stuffs

Official stamps depicting foodstuffs are issued by Liberia (pineapple), South Africa (orange tree), Ecuador (cocoa bean), Dahomey (date palm), Liberia (pepper), Kedah (rice), and Mozambique (corn).

ENTERS MINISTRY

British Columbia's first woman candidate for the ministry of the United Church is Miss Norah L. Hughes, graduate of the University of British Columbia, and lately an assistant in botany at the provincial university.

Rusted Seed Wheat

Experiment Shows Germination Qualities Not Impaired

The use of rusted seed in certain experiments carried out by the field crop branch of the Saskatchewan department of agriculture in 1935 and 1936 suggested that this seed developed as well as the more expensive seeds used under similar conditions. S. H. Vigor, field crops representative of the provincial government, told members of the Western Canadian Society of Agronomy at the University of Saskatchewan.

The conditions under which the grain was seeded, Mr. Vigor said, were approximately normal. The rusted wheat germinated as well as similar samples not rusted and the young plants seemed quite as healthy. Later in the season the crop was subjected to a prolonged drought and hot weather. The crop grown from rusted seed apparently stood up as well as the other crops in the same vicinity.

Other members of the group instanced similar experiments and found similar results. There was, however, no general conclusion to be drawn from the experiments so far carried out. It was believed that more experimental work might be necessary to conclusively prove the comparative value of the cheaper seed wheat.

Another matter respecting the influence of the rate of sowing on the development of weeds received some attention. Several members suggested that heavier seeding helped in the reduction of weeds in the crop and thus reduced the amount of dockage in the marketed crop.

Factory Closed Many Years

Employer In Somerset Town Had Dispute With Labor

Twenty years ago one of the leading glove masters in Yeovil, Somerset, resented the demands of his employees, said "all right, I can do without you."

Within a few minutes his last instructions were obeyed. Work ceased and the great oil engine which gave power to the glove machines petered out, men and women passed out through the doors for the last time. The factory had closed down.

Mr. Gould died, but the "ghost factory" remained closed—until recently when an army of workmen entered. They found dust inches thick over floors and benches; the sewing machines rust-bound and choked, still with silks threaded through the needles.

With spade, brush and shovel, this large factory had its clean-up. A revival of industry in this busy town demands it. Floor space is urgently needed to cope with Yeovil's increasing trade.

Not Very Grateful

In Kansas City a woman was knocked down by a car. Out popped Sir Walter Raleigh in the person of Johnny Carroll, grocer. Sir John brushed the lady off, took her into his store, gave her a glass of water and inquired if there wasn't something else he could do for her.

"Well," she said, "I've got to get some groceries before I go home. Will you take me across the street to the chain store?"

First Guest—"What's holding the wedding up?"

Second guest—"Oh, the bride's father is a plumber and he forgot to bring her."

There are 800 theatres in New York City. Of these, 252 are legitimate theatres, the balance movie houses.

Occasionally a man gets so discouraged that he feels like writing poetry.

For Exhibition Purposes

Surgical Operations On Dogs And Horses Should Be Prohibited

A Toronto magistrate dismissed a charge of cruelty to animals preferred against a veterinary surgeon who clipped a dog's ears and put a wooden frame on the animal's head to keep the mutilated ears in place. The evidence revealed that the dog had been in a fight with another dog and his ears had been so lacerated that it was necessary to perform surgical repairs. The erroneous impression was given that the ear-clipping process was for the purpose of preparing the dog for exhibition purposes. The magistrate remarked that if it had been established that the operation was merely to have the dog's head conform to certain showing fashions, his decision would have been different.

This case brings to recollection that there has been sharp disputes concerning show requirements in the cases of horses and dogs. It was the custom to dock the tails of horses in certain classes, for exhibition purposes, and it was also the custom to clip the ears of certain breeds of dogs and put them into a wooden frame so that they would stand up to give the animal an alert appearance.

These surgical operations were painful, there can be no doubt about that; but show-ring fashions are immutable, like the laws of the Medes and Persians. However, many humane persons do not think much of these modes for dogs' ears and horses' tails. They are sufficiently normal to believe that it is hard to improve on nature when it comes to appearance, in the case of all animals. Horses and dogs, who are the faithful servants and companions of human beings, ought not to be subjected to unnecessary pain just because someone has thought of a freak fashion. The way to cure that idea is to clip the ears of exhibitors and put them in wooden frames until they heal. One experiment of that kind would end any inclination to try it out on the dog.—Woodstock Sentinel-Review.

Woman Has Strange Pets

Wife Of British Consul In Detroit Devoted To Snakes

Additions to the exhibits at the new Detroit Insect Zoo in Convention Hall included three snakes loaned by Mrs. L. C. Hughes-Hallett, wife of the British Consul in Detroit, who finds that snakes make "marvelous pets."

Mrs. Hughes-Hallett lent to the zoo an Arizona bull snake, a California bull snake and a pilot black snake caught near Albion, Mich.

"Snakes are not just a hobby with me," Mrs. Hughes-Hallett said. "I am devoted to them and they are devoted to me."

She acquired a fondness for the creatures in India, where she was born, she said, and has caught, raised and trained them since she was a small girl. She is delighted particularly by their responsiveness after brief training.

"The California bull snake, which I have had for more than two years, would sit for hours in front of my chair without moving," she said. "I became very fond of it, even taking it for automobile rides."

France is getting a law to abolish tipping. Next in order is a law regulating the tides and the sunsets.

ELIZABETH TRIMS A COURTIER'S BEARD

An amusing episode in the Pageant of Surrey being performed this summer in London as an aid to hospital charities. Elizabeth of York is helping a courtier to make up for his part in the pageant by trimming his beard.

MAKE THIS MODEL AT HOME—SLIMMING FROCK A STYLE LEADER

By Anne Adams

You're going to shine in Summer's Fashion Parade when you don this lovely afternoon frock, an Anne Adams "charmer," that seems to melt pounds from your figure and bestow upon you those slender, graceful lines you've been longing for! Club-meetings, tea or bride parties—all your varied afternoon festivities will demand just such a flatterer as Pattern 4451, a joy to behold made up in a flower-spangled synthetic, shadowy sheer chiffon, or inexpensive printed voile. Don't you just love the brief sleeves, dainty bow-accented yoke, V-neckline, and gracefully flared skirt? Send for the easy pattern, and start your frock immediately!

Pattern 4451 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 takes 3 3/4 yards 39 inch fabric. Illustrated Step-by-Step Sewing Instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number, and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Dogs Are Disease Carriers

New York Society Would Bar Them From City

Formation of a society to bring about the complete banishment of dogs from New York City is announced.

The sponsors, describing themselves as dog lovers who felt that the animal would be better off in the country or suburbs, declared that, though lovable in some respects, dogs were the city's worst disease distributor. The organization is tentatively called the Animal Welfare Society.

Hawaii produces about 216,000,000 cans of pineapple annually. Placed side by side, these cans would reach halfway around the world.

Increased living costs is becoming a serious problem in Bolivia.

The Age Of Haste

Little Time Now In Which To Cultivate The Graces

The eighteenth century was a classical period. It looked back to the ancient days for its models in art and literature—even in architecture. For its eloquence it looked to Pericles and Demosthenes and Cicero. It was a spacious period. It had leisure to cultivate the graces.

We live in a different age, in a world grown infinitely small. We have so much to do and so little time in which to do it that we have no leisure to listen while men develop their ideas at length or let their fancy roam or indulge in eloquent perorations. Our problems are pressing. We have no time or think we have no time, to subject them to the slow solvent of deliberation. We like to break them open with a steam hammer or blow them up with powder and get at their interior.

It is all of a piece with our hurry. We fly where our ancestors rode in an ox cart. We telephone where they wrote a letter. We use the closure in our parlaments, we synopsize our music, we eat a large percentage of our meals at the quick lunches.

It is all this rather than the radio that has interfered with the old-time oratory. No one, of course, can picture Mr. Speaker holding a stop watch or Edmund Burke or Demosthenes submitting himself to the discipline of a radio studio. But can anyone picture Burke or Demosthenes living in our age? They would be as much out of place as the dinosaur.—Vancouver Province.

Goes To Greenland

Dr. Porsild, Of Ottawa, To Visit His Relations In Far North

Dr. A. E. Porsild, now a botanist in the National Museum of Canada, is leaving for Godhavn, North Greenland, to visit his parents, Dr. and Mrs. Morten Porsild. His father, director of the Danish scientific station, Godhavn, has twice visited Ottawa, but Dr. A. E. Porsild has not seen his mother or sister for at least 12 years.

The Canadian Government scientist is sailing to the Far North with Captain Robert (Bob) Bartlett on the schooner Morrissey. Bartlett is headed for Smith Sound between Greenland and Ellesmere Island, but will stop off at Godhavn to enable Dr. Porsild to join his family. He will pick him up again two months later.

Dr. A. E. Porsild was in the headlines on many occasions in connection with the reindeer drive from Alaska to the Mackenzie district of the North West Territories. He made an investigation of the grazing possibilities of the Mackenzie district and later superintended the arrival of the herd, lecturing on his adventures before the Royal Geographical Society.

Want To Solve Puzzle

How Eel Turns Food Into Electricity Problem For Scientists

How would an eel turn its dinner of fresh fish into 500 volts of electricity? Two scientists who have just returned from Brazil after spending two months studying the electric eel are looking for the answer. The electric eel is said to be part fish and part power plant. "We kept a careful record of electrical discharges of 27 eels," one scientist reported, "and we found that the smallest eel—only eight inches in length—gave off a regular impulse of not less than 110 volts. The most potent discharges recorded was one of 50 volts from an eel about a yard in length." Indians dwelling along the shores where the eels are found fear the high tension creatures as much as any beast of the jungle.—Peterborough Examiner.

A Profitable Business

Newly-wed couple in Munich who purchased 18 different bedroom suites, are now spending their honeymoon in prison. Through Hitler's "aid to newly-weds" plan, they obtained special coupons to enable them to get furniture on the hire purchase system. Before they were caught they had sold their 17 surplus suites, realizing about \$20,000.

Forced To Use Concrete

In the midst of a great construction boom, Argentina is faced with a serious shortage of iron and steel. Recently the government, which approved an extensive building program including the erection of several steel-structured departmental buildings, has changed its plans and will now use reinforced concrete instead.

Why don't the experts on the use of leisure figure out something for people to do Sunday afternoon besides piling into automobiles and killing themselves.

TOPICS of VITAL INTEREST

by DR. J. W. S. McCULLOUGH

ARTICLE No. 1

PREVALENCE OF CANCER

Cancer is rather prevalent all over the world. Knowledge of this fact causes uneasiness in the minds of some middle-aged persons. But cancer is not nearly so prevalent as heart disease and few persons lose any sleep over the thought that they may die from heart disease.

Statistics are quoted to show how rapidly cancer is increasing. The figures published by statisticians, who revel in figures, would lead one to think that cancer is increasing very rapidly. In spite of this, one doubts if there is any considerable increase of cancer cases from year to year.

Much of the apparent increase is due to greater skill of doctors in finding cases of cancer; to the better records of mortality in the last generation and to greater knowledge of disease among the people themselves. Moreover, people of the present generation are living longer than those of former generations. Fifteen years on the average have been added to the life of man since 1900. Since cancer is a disease chiefly of middle life and after, the longer people live the better opportunity there is for them to develop cancer. Ninety per cent. of all cancers occur after 35 years. The prevalence of cancer, while serious enough, need not unnecessarily alarm the public.

Even at this cancer is a serious malady. It stands second in the list of the "killing" diseases. In the last 30 years cancer has displaced tuberculosis from this position. The affection costs Canada between 10,000 and 11,000 lives each year.

Countries with a higher average age in its population appear to have more cancer, judging by the death rates, than countries where this average is low. Great Britain and the continental countries of Europe, have, for this reason, more cancer than young countries like Canada, where the ages of the people are on the whole, lower. Similarly, there is, for the same reason, more cancer in the older provinces than there is in the prairie provinces. The latter's population is on the average younger than that of the Maritimes, Ontario, Quebec and British Columbia. As our country gets older, and the population assumes a higher average age, the incidence of cancer is likely to increase.

Article No. 2 will be "What Is Cancer?"

Good Place To Live

Helsingfors Will Not Allow Noise At Any Time

Angora, which has just issued a decree prohibiting unnecessary noises in the streets, has nothing on the city of Helsingfors in the matter of quietness. In the big Finnish seaport motor horns and sirens are banned, there is a similar veto on tramcar bells and ships' hooters, newsboys are forbidden to shout, hawkers have to peddle their wares sotto voce while even street corner orators are compelled to spout indoors. As a result a sort of Sabbatarian calm prevails at the busiest hours, and profoundly impresses the average visitor.—Glasgow Bulletin.

Poison Snakes For Zoo

Travel In Separate Boxes From Calcutta To London

Sinister arrivals at the London zoo are eight Indian banded krait and seven Russell's vipers, among the deadliest poison snakes in existence. These newcomers to the reptile house travelled all the way from Calcutta, each in a separate box. They needed no food during their long voyage, but had periodically to be sprinkled with water through the perforated lids of their cases.

Airplane Fowls

"Say," said the woman customer over the telephone, "the next time I order chicken, don't send me any more airplane fowls."

"What do you mean—airplane fowls?" asked the butcher.

"You know what I mean: All wings and machinery and no body."

Beaver dams were important and helpful in controlling erosion in this country before man's arrival.

THE YELLOW BRIAR
A Story of the Irish in the Canadian Countryside
By PATRICK SLATER
By arrangement with Thomas Allen, Publisher, Toronto
CHAPTER VIII.—Continued

"Cross your heart, Paddy, are there faeries?" the child asked me. "I'll not be denying them," I told her, "or the little people might let me fall down and hurt myself."

"Why, Betty," I went on earnestly, "the world wouldn't get along at all without the faeries. It's the faeries that keep the little birds and bees from getting lost. It's a fairy that teaches a little calf to hunt and wag its tail in order to get the milk. Come down with me," said I, "and I'll show you the faeries at their work."

As we entered the stable door, the swallows were skimming in and out from their clay nest stuck on the ceiling beams.

"Just look at that," said I, "it's Irish faeries that taught the birds to build their neat clay cabins up where everything is safe and dry."

"Oh," Betty questioned, "but the swallows always did that?"

"Oh no!" I told her, "they couldn't do that till the Irish came into the country and built the stables for them. And, of course," I proceeded, "the faeries we brought with us from Ireland knew all about mud cabins and such like. . . ."

The old sow, Sally, had farrowed that morning, and I had just left her sprawled contentedly on her flank, with a mass of squirming black sucklings pulling at her dugs.

"Just look, Betty, at the faeries teaching the little pigs how to get their bellies full of milk," I told the child.

"Oh! Dod, how many are there?" she exclaimed, as she hoisted herself on the side of the pen.

"Twelve," said I, "and a runt. And each one knows off-hand his own proper drinking place, and watch him fight for it. Now that," said I, "must be the work of the faeries."

"Why, Betty," said I, "you wouldn't be denying your own little fairy? She comes to you when you are all alone, and tells you you are a bad little girl, and makes you feel sorry."

"Well," Betty confided to me, "I never right heard her talking, Paddy, but I do feel her whispering to me. . . ."

"There you are," said I, "your own tiny pixy may be too small to be seen, but she's round with you all the time, is your little Colleen Rue. Just leave old Sarah Duncan to mind babies," I told her, "and come to Paddy Slater for reliable information about the little people."

Time flew by like a bird on the wing. In the spring of 1850, Bob O'New Pitsligo came to the Marshall farm in Mono; and he stole away from me the heart of young Charlie Marshall. Two seemed company for them—but three a crowd. Bob was a black collie with tan markings, and the white collar on his neck stood out like the ruff on Queen Elizabeth in the old history book. He was a collie pup of high degree, with but one year to his credit; but, as for seeing the world, the young dog could do some stout boasting. The best blood of Scotland, ye ken, flowed in his veins. James Duffus had brought the young dog out with him that spring from New Pitsligo, in Aberdeenshire; but the Scotsman tired quickly of farm conditions in the colony, and, on returning to Scotland that fall, Duffus had given

the dog and the boy to one another because of the warm attachment that had grown up between them. It was a fast friendship that lasted till death parted them. The two were chums who knew no quarrelling; there was never anything between them to forgive or forget. Of course, the normal lifetime of a dog is but a brief space. He reaches maturity at eighteen months; at which time he has got his learning and his habits are formed; and the infirmities of old age creep upon him after the tenth year.

I say little as to what has come out of Aberdeenshire; because I find the Highland Scots well able to blow their own horns. Even their oats, they'll tell you, have more heft and are more nutritious than the chaff-like things we grow hereabouts. Yet it is a thing out of the ordinary, I'll admit, that the best beef cattle in the world, the Shorthorn and the Angus, were bred up to perfection in a rough shire that can also boast good dogs and many bonnie women. "Facts are chields that winna ding and 'durna be disputed."

The Scotch collie was the dog of the Highland shepherd; and a pure, honest celt was he. For centuries, his forebears held a gentle dominion over the timid, black-faced sheep in the North. Life in the open, during the nights of a thousand years beside the plaid, gave him a fine silken undercoat of thick fur. On his native heath, he knew one master only; and the very life of the dog hung on serving in an acceptable way the great, inscrutable, hairy-legged creature who was helpless and forlorn without him. Even on the Lord's Day, the Scotch collie took his shepherd to church; and he had the decency to put off private affairs and dog fighting until the psalms were sung and the benediction said. Centuries of such intimate, personal, working contact with dour shepherds, in a great quiet world of flocks and winds, subjected the young of the collie breed to a slow, stern process of selection under which the witless and the wayward died on the lonely heath, and did not live long enough to reproduce their kind. If a collie bitch let her love fancy wander to another type, it was a pitiless world that faced her mongrel brood.

And the body of the Scotch collie, and his mind also, are the result of centuries of training. In eastern lands, the sheep follow the shepherd's rod and staff; on the Scottish Highlands, great flocks roamed leisurely over rough, broken pastures; and it was the lonely shepherd's dog who guarded them as they lay in green pastures, and led them beside the still waters.

Bob's body was built to answer the needs of such a life of service. His ears were small and erect, save at the tips. With body long and thin flanked, and legs strong and muscular, the shepherd's dog was fleet on his way, and swift as a flash of light. His small, keen, sharp eyes, set slightly oblique on a long pointed skull, followed his master's signals from afar.

One would have to renew within himself the heart of his childhood to realize the thrill it gave Charlie Marshall, a quiet-spoken, barefoot boy of ten, to have as his first, and as his special and very own possession, a big, fun-loving, brown-eyed dog like Bob. There was a riot in their play; and a noisy climax to the tricks they put over on one another. While the pup pretended to be keen on a bone or busy about affairs of his own, Charlie would make speedy tracks to the barn; and shinning up the ladder, slip through an opening in the loft and down a rope to find a hiding place behind some stump or boulder. Off Bob would then dart, his face beaming with excitement, to work out the problem of the broken trail, and with a joyous bound to spring upon the fugitive, pulling at the boy's pants and poking a long, wet snout into his lugs. A trail broken by wading up the creek was a smart trick; but Bob solved it. It strikes me that what a dog once learns he never forgets.

Charlie and his dog proved a useful pair about the Marshall farm. It had been the boy's job to bring the milk cows home; and, in some seasons, that had been quite a task for the little lad; because the cows wandered far to find green pickings in sheltered, hidden places. But Bob now went with him, which made it a simple and pleasant matter.

One Saturday afternoon, Charlie slipped off a beam in the barn, and his ankle was badly sprained in the fall. This caused a delay in the cow-bringing job; but not to leave things in a lurch like that, the dog quietly went back to the bush and brought the cows up on his own account. I do not, of course, ask you to infer that the dog was doing any thinking; he may have been an automaton guided by some blind instinct. But an interesting point is that Bob did not bring up all the cattle. He did not bother his head with Buck and Bright, nor the other young stock,

No! Bob just brought up the cows that required milking. And after that the collie made a practice of going for the cows himself; and night and morning, and right on the clock, the string of sedate matrons wound slowly into the stable yard. And the dog made it a friendly, leisurely business. As you know, a milch cow's nerves should be calm and restful at the milking time, because she actually makes the milk while one expresses it from her. Unless she is in a mild, patient and benevolent humor, her milk glands become stingy with their secretions. Bob saw to it that there was no dogging of the Marshall cows.

One morning, Bob brought up an excited roan heifer to the milking yard.

Marshall smiled. "So, Bobbie, you think Flossie'll be needing the milking too. If you'll help me, we'll just slip her into the stable, and after she gets a bit more impatient, we'll follow her down and find her calf."

It was a highly excited heifer that was let out, after what seemed a long wait, to run bawling down the lane toward the bush where her treasure lay hidden. But it soon became apparent to Marshall that the young mother had no notion of leading the two brutes to the hiding place of her precious, little, saucer-eyed calf. She was on to their tricks; and time was not the essence so far as she was concerned. No! let that wicked man run his legs off chasing a loving mother over fallen trees in accessible gulleys!

And a pale-faced human makes a poor first of finding anything in unbroken timber lands. He has only his ears and eyes to guide his quest. And a young cow, who has gone wild at calving time, hides a calf that crouches mute and still as a granite boulder until hands actually laid on its body prove that the game is up.

(To Be Continued)

Gathering The Ship-News

Not As Exciting As It Was Before Radio Was Used

One day in a recent week, thirty-nine passenger-ships were announced to arrive in New York's harbor.

From the Barge Office, two cutters were ready to take the press-writers and photographers down seven miles of bay to meet the pretty girls and famous personalities on the more important incoming liners.

The Ship-News Reporters' Association office in the Barge Building at the Battery became a riot of jangling telephones from newspaper city editors who wanted to know where the ships, incoming celebrities and their reporters might be in all the confusion.

Heading the delegation was T. Walter ("Skipper") Williams, of the New York Times, dean of Gotham's water-front corps of reporters. A native of England, now in his sixties, "Skipper" has finished his 32nd year of active service. He says he's seen them all come and go, but that covering ships isn't what it used to be.

"The personal touch is gone," he laments.

Once upon a time, tugboats would put out from the New Jersey coast. They would approach incoming vessels and have dispatches thrown down. These, in turn, would be telegraphed from the Jersey coast.

"But with the radio, newsreels and cables—the news is old before we even get to it," Williams said. "The real old-time ship-news reporting went out when Marconi came in."

The "Skipper" plunged into work as soon as he returned from (his 104th crossing) the Coronation and the opening of the Exposition in Paris. Emphatically he denied the statement that he disapproved of Miss Dixie Tighe of the New York Post, first and only woman ever to cover ships in New York. He says he merely is fearful that women will get hurt clambering up the sides of ships.

Determine Age Of Fish

Growth Of Rings On Scales Give Scientists Clue

Microscopic annuli, or growth rings, on the scales of striped bass are providing science with new data explaining for the first time the mysterious movements of fish that have puzzled fishermen for generations.

Daniel Merriman, graduate student in zoology at Yale University, is completing an extensive study of the growth rings on bass at the mouth of the Niantic river in Connecticut, and has found that the rings correspond to the growth rings of trees. Studied under a microscope, the annuli reveal the age of the fish, the rate of growth and whether it goes south in winter.

A Vienna barber won a contest by shaving a man in 18 seconds. The customer should get a medal for bravery.

BABY'S OWN SOAP
Best for You and Baby Too

Was Once A Hospital

St. James's Palace Has Special Place Among Royal Estates

As the scene of several marriages and christenings within the Royal family, St. James's Palace has a special place among the royal estates of King George and Queen Elizabeth.

Originally the palace was a hospital "for fourteen maidens that were leprous" until that acquisitive monarch, Henry VIII, converted the building into a hunting lodge. From this time dates the Gatehouse, which to-day presents the most favorable aspect of the approach to the Palace. Most of the children of the ill-fated Charles I. were born at St. James's, and it was from there that he walked across the park to his execution in Whitehall. William IV. was the last monarch to make this castle his principal residence.

The present King's father and mother, George V. and Queen Mother Mary, were married in the Chapel Royal of St. James's which still preserves the ceiling attributed to Holbein, a masterpiece of art. George and Mary were married in this chapel in 1893.

Queen Victoria was married there in 1840, and the future German Emperor and Empress Frederick (daughter of Victoria) in 1858.

Few of the historic buildings of the Empire's capital greet the eye with more charming effect than does St. James's Palace. With its octagonal towers of mellow brick, its mullioned windows and quaint carvings it takes the beholder into the times of the Tudors.

Although St. James's has long ceased to be a residence for the sovereign, the Royal leaves are still held in it, and within its quiet precincts reside several members of the Royal family. Many Canadians will recall waiting upon the former Prince of Wales, who for many years had his quarters at York House, St. James's.

The State apartments in recent years have not only been used for ceremonial occasions such as levees, but have also served to accommodate gatherings of Imperial moment like the India Conference. From the windows of the old presence chamber the new sovereign is still proclaimed on his accession. The magnificent fireplace bears the initials of Henry VIII. and Anne Boleyn.

Mysteries Of Ocean Currents

Buoy Drifts From Arctic Ocean To The Bay Of Biscay

A buoy cast into the Laptev Sea (in the Arctic) by the ice-breaker Sibiryakoff during her voyage from Archangel to the Pacific in 1932 has been picked up in the Bay of Biscay, near the French coast, and sent to the All-Union Arctic Institute at Leningrad. It is estimated that the buoy must have travelled more than 7,800 miles, and Professor V. Y. Wiese is of the opinion that it drifted from the Laptev Sea to the Polar basin north of Franz Josef Land, then down the East Greenland current to the southernmost promontory of Greenland before reaching the Bay of Biscay.—London Times.

Canadians Eat More Pork

Has Now Supplanted Beef As The Favorite Meat

Pork is the favorite meat on the Canadian menu. Figures published by the Dominion bureau of statistics on meat and dairy products consumption during 1938 show pork has supplanted beef.

Beef and veal consumption fell from 723,679,000 pounds in 1935 to 655,390,000 in 1936 while pork jumped to 748,005,000 pounds from 678,070,000.

More chickens went into pot and roasting pan, but demand for turkeys, geese and ducks fell off.

Butter consumption has increased steadily in the past four years.

Natives of Tristan da Cunha, a tiny island of the South Atlantic, have never owned tooth brushes, but 84 per cent. of them have perfect teeth.

"When the Battle of Trafalgar was fought the papers did not give much space to the first reports," says a historian. But Lord Nelson got a column.

London spends \$40,000,000 a year on its police force.

Youth Of Canada

Former McGill University Principal Has Words Of Praise

According to Professor A. E. Morgan, former principal of McGill University, Montreal, modern university youth of Canada constitute "one of the very striking assets of Canada."

"In the universities one sees the best examples of those who are going to be the leaders of Canada tomorrow," said Prof. Morgan, who has just returned to Great Britain. He declined to make any comment upon his resignation as principal of McGill. He said he had no definite plans for the future beyond taking a holiday.

"If one dared to generalize, one would say that the youth of Canada is less sophisticated and more optimistic than the youth of Great Britain," said Prof. Morgan.

"This does not mean that conditions have been easy for him. Emphatically, they have not, and the unemployment of youth has been very serious. But their spirits do not seem to have been dampened and one fails to find evidence of cynicism."

Discussing Quebec province, the ex-principal of McGill said "the province is in some ways the most reactionary part of Canada. At the same time, it is a stronghold of the older cultures, both French and English. In that respect it makes a great contribution to the Dominion as a whole both as a leaven and a steadying influence."

Started Him On Career

Unpleasant Experience Set Newspaper Man's Feet On Writing Trail

Frank Clifford Smith, 72, whose literary career began when a bunch of thirsty Indians dumped him ungently atop a stove, is dead.

He had been on the Montreal Star's staff for 40 years, and many a time in that period he had set young reporters to chuckling over his recital of how he became a writing man. It happened on the western prairies, when he was in charge of an isolated telegraph station.

Indians were about his only companions at the lonely post. One night, he passed around a bottle of "fire-water." The redskins soon drank it, and asked for more. None forthcoming, they sat their host on the office stove and threatened to light the fire unless he found some.

Persuasive argument got him out of the predicament, though, and soon after he capitalized on the incident to win a \$50 prize offered by a London periodical in a personal adventure story contest. That set his foot on the writing trail, and he wrote plays, novels and short stories from then on, besides his newspaper work. He was a native of Kendal, England.

A very thin man met a very fat man in the hotel corridor. "From the look of you," said the latter, "there might have been a famine."

"Yes," was the reply, "and from the look of you, you might have caused it."

The average human body loses weight at the rate of one pound every eight hours by evaporation of moisture through the lungs and the pores, and through exercise.

The World War added 6,000 new words to the English language.

FORMER ATHLETE ALMOST A CRIPPLE

Now "Right As Rain" After Taking Kruschen

Read this letter from an athlete, telling how he obtained relief from rheumatic pains:—

"My knees were so stiff with a kind of rheumatoid trouble that I could only rise from a chair with pain and difficulty. This had been growing worse and worse for about two years. It was all the more galling because in my young days I had played for two counties at football and held my college record for the 100 and 220 yards. Naturally I tried all sorts of embrocation, but with absolutely no perceptible effect. Then I decided to try Kruschen Salts, and to cut a long story short, I am now as right as rain."—W.S.T.

The pains and stiffness of rheumatism are frequently due to deposits of uric acid in the muscles and joints. Kruschen helps to stimulate the excretory organs to healthy, regular activity, and so enables them to eliminate this excess acid from the system.

Little Helps For This Week

One thing have I desired of the Lord, that will I seek after, that I may dwell in the house of the Lord forever, to behold the beauty of the Lord and to inquire in His temple. Psalm 27:4.

Thou art the Temple, and though I am lame, I am lame, and shall be till I die, I enter through the Gate called Beautiful, And am alone with Thee, O Thou Most High.

Consider that all which appears beautiful outwardly is solely derived from the invisible spirit which is the source of that outward beauty. These are streams from the uncreated Fountain, drops from the infinite Ocean of all good. Our hearts should rejoice at the thought of that eternal infinite Beauty which is the source and origin of all created beauty.

Not Particularly Helpful

Man Received No Assistance From Secretary Of Client

Arriving in New York on a business trip a gentleman was invited to dine at the house of one of his clients. He forgot to ask how formal the meal was to be, so when he went back to his hotel to dress he called the client's office, and finally got through to his secretary. "I'm going to dinner at Mr. J.'s house," he said, "and I want to know whether to wear a white or a black tie." "That all depends," she said brightly, "on whether you are going to wear tails or a dinner jacket."—The New Yorker.

Railway Electrification In Sweden

Completion of electrification of 602 kilometers of railway lines in Sweden this year will bring the total electrified mileage to 3,349 kilometers, 35 per cent. of all lines belonging to the state railways, carrying 70 per cent. of the traffic.

Wheat has been planted on 32,167,000 acres in India this year, and good crop is expected.

A REVOLUTION IN THE KITCHEN

Presto-Pack

Presto-Pack is a new and revolutionary way of handling Household Waxed Tissue. 45 sheets packed in an envelope which you hang on the wall. Then as you require it, just draw out a sheet at a time. You can't draw more. That's the beauty of it.

Try Presto-Pack today. You'll find it the handiest thing in the kitchen.

ONLY ONE SHEET AT A TIME CAN BE DRAWN.

At grocers, druggists, stationers and departmental stores.

Saskatchewan Would Pay

Settlers Fare To Matsqui

The Fraser Valley municipalities—Matsqui particularly—are debating a somewhat delicate land-settlement problem, outcome of crop failure on the prairies. Every week Clerk Pennington receives inquiries, (five last week from Southern Saskatchewan) about lands in Matsqui available for settlement. The letters come from families forced upon relief by drought and state the Saskatchewan provincial government will advance freight costs to convey them, the stock and effects to British Columbia if they find suitable locations.

All Matsqui Land Not Arable

Harassed with a serious relief situation, the Matsqui Reeve and Council are naturally opposed to bringing such families into the district. Of the 55,000-acre area of the municipality, Reeve Cruickshank estimates the cultivated acreage to approximate 14,000 to 15,000 acres. Ten thousand acres of the remainder is suited only for reforestation, and this should be done forthwith as a relief measure, in his opinion. The municipality owns upwards of 2,000 acres of tax sale lands, of which only 200 is suited for settlement, and the municipality refuses to permit families settle upon barren gravel lands, as the outcome is known only too well.

"We expect at least 100 new families will come into Matsqui from the prairies within the coming 12 months," the Reeve said "And we will certainly do our best to see them settled only upon lands affording them a chance to make a livelihood."

140 Applications for Library Job

Mr. C. J. Bennett, of Mission City, has recently been added to the library staff at headquarters as assistant during the absence of Mr. Grossman, who has a year's leave of absence to take up special studies at the University of California. Mr. Bennett and his family are well known in Mission City, where they have been resident for many years, and where Mr. Bennett has been active in such associations as the North Fraser Young People's Union and the Fraser Valley Amateur Dramatic Association. He has also done work of the Vancouver Sun and has written for various other periodicals.

The executive of the library board received 140 applications for the position given Mr. Bennett.

HEALTH NURSE'S REPORT

(Continued From Page One)

don before reaching epidemic proportions. In November, chicken-pox assumed epidemic proportions in Matsqui, but was confined to several large families. April was free of infectious diseases, but measles and scarlet fever broke out in May, which meant that most of our time was devoted to checking absentees from school. However, we were able to keep the number of cases down to 14.

Measles were much more severe than any of the other diseases, and several cases were followed by pneumonia and other complications.

In October a new school was opened in the Poplar area to accommodate the influx of Mennonites from the prairie. Several children in the new families were excluded from school with scabies for some time. Impetigo too has been the cause of loss of time. Tabulated list of diseases: Vermin, 3; scabies, 7; impetigo, 33; ringworm, 11; measles, 87; chicken-pox, 18; scarlet fever, 17; mumps, 6; polio myelitis, 1.

Children Given Medical Aid

Chest clinics were held in October and May by Dr. Lamb. Forty-five cases were X-rayed and examined, and two cases recommended for sanatorium treatment. Three children were taken to Vancouver for eye tests, and glasses prescribed. Arrangements were made for the purchase of the glasses. Five children from the area

RIDGEDALE

At a recent community gathering in the hall. Mr. W. M. Page, on behalf of the friends there presented a handsome electric clock to Mr. Elmer Beharrell and his bride.

On the same evening the president of the Women's Auxiliary, speaking for their members, presented to Miss Jessie Duncan a silver and cut glass relish tray.

At the school closing, Miss Duncan was also given a silver pie-knife, by her pupils as a parting gift.

The dance sponsored by the Ridgedale Rod and Gun club, on Friday evening brought a capacity house.

Mr. and Mrs. W. Gurney and Miss Mary Gurney are the guests of Mr. and Mrs. Nelson Gurney.

Miss Muriel Page has returned from a stay at Keats Island, where she spent a holiday with Miss Celeste Page and June Beharrell.

Miss Jessie Duncan is visiting with relatives in Vancouver and Seattle.

Mrs. Frank Smith, returned to her home on Sunday after spending a visit in Vancouver.

Hope is rendezvous today for the Chilliwack Conservative Association, and several local members of the party are enjoying the picnic and amenities of the occasion.

ANNOUNCEMENT

Mr. and Mrs. William J. Bates of Gifford announce the engagement of their daughter, Freda Agnes to Mr. Frank Threlfall, son of Mr. and Mrs. J. Threlfall, of Matsqui, B.C.

The wedding will take place at the Mt. Lehman Presbyterian Church on August 18th at 8 o'clock p.m.
